Due to the audit in Mannheim we were with a small group, and had a very brief meeting.

2. WP2

Has mostly worked on getting all the necessary documents for the audit in order.

3. WP3

4. WP4

Still working on interpreting the models, trying out different things.

5. WP5

...

6. WP6

Has submitted for ethics (SMEC) to be able to interview the consortium members about regulatory issues. And they have been helping with the ethics amendments. Elise has had problems reaching Kosice – Iveta/Zuzana please contact Elisa! She needs to know what the status of the amendment is.

7. WP7

Bratislava will submit their amendment after the audit in Mannheim. And has also mostly worked on preparing the necessary documents for the audit.

8. WP8

Jeroen will be the one who checks whether everything is in order with the preregistrations (so not also someone else from the SC / the initial reviewer).

One abstract in DROPS was not approved for some reason, but it should have been, so everyone will soon receive an email about that.
